## VIRAL HEPATITIS REPORT

Result

\*794581\*

7945815

26-Nov-2025 04:59 PM

Test

HbsAg (S)

Negative

### Comments:

Anti HCV, HBsAg were performed by an immunochromatographic screening method. The Technique has Sensitivity of 99% and Specificity of 98%. Clinically inconsistent result should be reconfirmed by an alternative method (e.g ELISA)

Anti HCV (S)

Negative

### Comments:

Anti HCV, HBsAg were performed by an immunochromatographic screening method. The Technique has Sensitivity of 99% and Specificity of 98%. Clinically inconsistent result should be reconfirmed by an alternative method (e.g ELISA)

Electronically verified report. No signature(s) required.

Disclaimer: No single test result is diagnostic, Clinical correlation is must. Although all the tests are performed with great care and diligence, lab to lab variation and human error may occur due to pre analytical, analytical and post analytical reasons. In case of any query please contact lab incharge. Thanks.
