

Patient No: 3492103 *34921A8* T/R ID: 3415131 *341513R* T/R No: TR251119-458-TB1-6

Patient Name: Mr. Asad
Age/Sex: 19(Y) / Male
Phone: 03298269985
Collection Time: 04-DEC-2025 06:47 PM
Consultant:
Reporting Time: 30-Nov-2025 08:59 PM
Approved By: Adnan Khan
Registered at: Ayzal Laboratory
Referred By: c/o ammar sb

VIRAL HEPATITIS REPORT

Test

Result
7945815
7945815
19-Nov-2025 08:59 PM

HbsAg (S)

Negative

Comments:

Anti HCV, HBsAg were performed by an immunochromatographic screening method. The Technique has Sensitivity of 99% and Specificity of 98%. Clinically inconsistent result should be reconfirmed by an alternative method (e.g ELISA)

Anti HCV (S)

Negative

Comments:

Anti HCV, HBsAg were performed by an immunochromatographic screening method. The Technique has Sensitivity of 99% and Specificity of 98%. Clinically inconsistent result should be reconfirmed by an alternative method (e.g ELISA)

Electronically verified report. No signature(s) required.

Disclaimer: No single test result is diagnostic, Clinical correlation is must. Although all the tests are performed with great care and diligence, lab to lab variation and human error may occur due to pre analytical, analytical and post analytical reasons. In case of any query please contact lab incharge. Thanks.
